

Ground Detection

April 10, 2019

Ecole des Mines Fontainebleau

Classes

- Unlabeled
- man-made terrain
- natural terrain
- vegetation
- other

Features Tested

1. Normal
2. Normal + z
3. Normal + z + refl

Normals: Confusion matrix

Errors

1. 27% of "natural terrain" is classified as "vegetation"
2. 14% of "vegetation" is classified as "natural terrain"
3. 14% of "vegetation" is classified as "other (buildings)"
4. 11% of "man-made terrain" is classified as "natural terrain"

Natural terrain classified as vegetation: Example 22

Figure 1: Ground Truth

Figure 2: Prediction

Figure 3: Normals

Vegetation classified as natural terrain: Example 12

Figure 4: Ground Truth

Figure 5: Prediction

Figure 6: Normals

Vegetation classified as other: Example 21

Figure 7: Ground Truth

Figure 8: Prediction

Figure 9: Normals

Man made terrain as natural terrain: Example 0

Figure 10: Ground Truth

Figure 11: Prediction

Figure 12: Normals

Normals + z: Confusion matrix

Errors

1. 24% of "man-made terrain" is classified as "natural terrain"
2. 16% of "natural terrain" is classified as "vegetation"
3. 14% of "vegetation" is classified as "other (buildings)"

Normals + z: Example 12

Comparing Prediction

Figure 13: Ground Truth

Figure 14: Prediction using Normals

Figure 15: Prediction using Normals + z

Normals + z: Example 17

Comparing Prediction

Figure 16: Ground Truth

Figure 17: Prediction using Normals

Figure 18: Prediction using Normals + z

Man made terrain as natural terrain: Example 0

Figure 19: Ground Truth

Figure 20: Prediction using normals

Figure 21: Prediction using normals + z

Figure 22: Normals

Natural terrain as vegetation: Example 22

Figure 23: Ground Truth

Figure 24: Prediction using normals

Figure 25: Prediction using normals + z

Figure 26: Normals

Vegetation as Other: Example 21

Figure 27: Ground Truth

Figure 28: Prediction using normals

Figure 29: Prediction using normals + z

Figure 30: Normals

Normals + z + refl: Confusion matrix

Errors

1. 19% of "man-made terrain" is classified as "natural terrain"
2. 18% of "natural terrain" is classified as "vegetation"
3. 12% of "vegetation" is classified as "other (buildings)"

Man made terrain as natural terrain: Example 0

Figure 31: Ground Truth

Figure 32: Prediction using normals + z

Figure 33: Prediction using normals + z + refl

Figure 34: Normals

Natural terrain as vegetation: Example 22

Figure 35: Ground Truth

Figure 36: Prediction using normals + z

Figure 37: Prediction using normals + z + refl

Figure 38: Normals

Vegetation as Other: Example 21

Figure 39: Ground Truth

Figure 40: Prediction using normals + z

Figure 41: Prediction using normals + z + refl

Figure 42: Normals

Unet F11: Normals + z + refl: Confusion matrix

Errors

1. 13% of "man-made terrain" is classified as "natural terrain"
2. 9% of "natural terrain" is classified as "man-made terrain"
3. 7% of "natural terrain" is classified as "vegetation"
